

# HACE

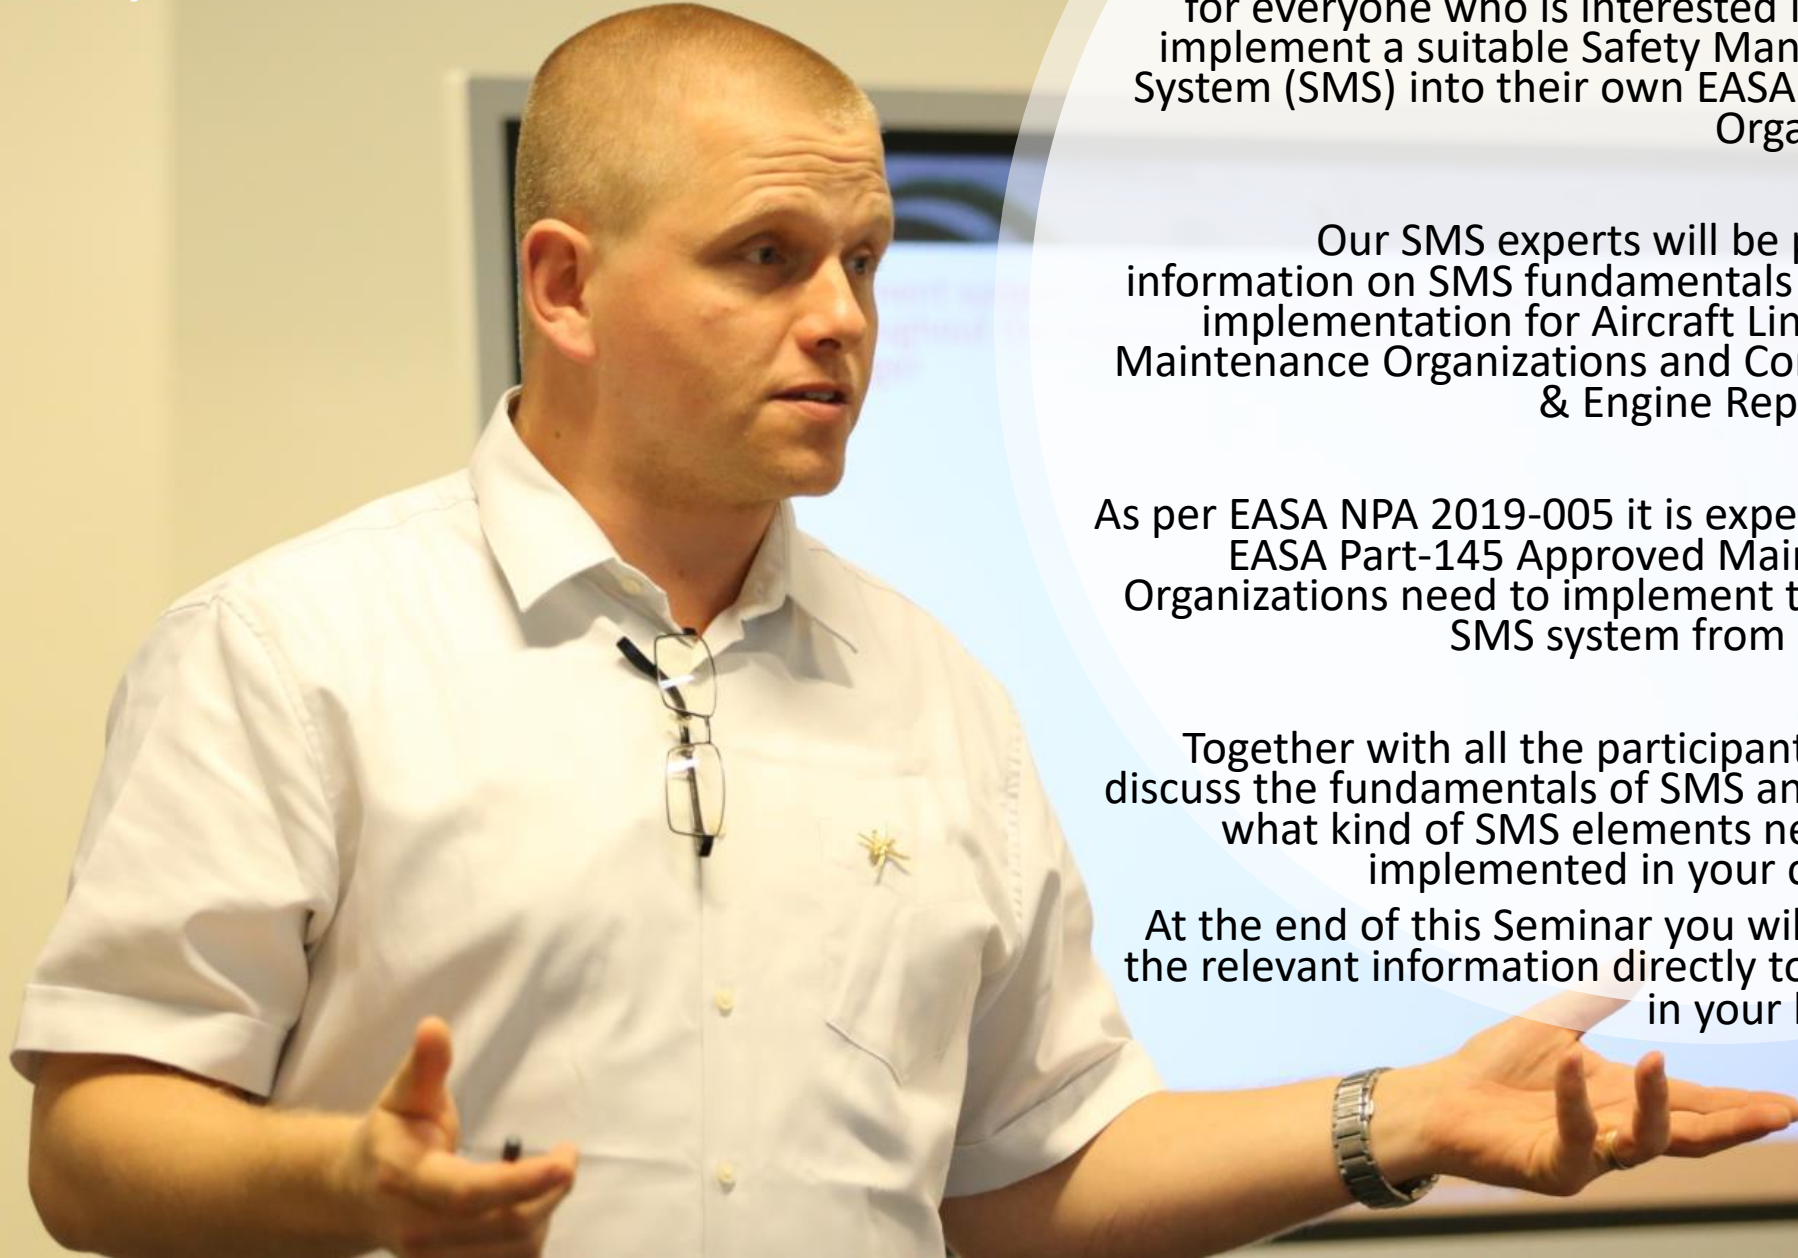

## One-day Seminar: How to implement SMS into your Part-145 Organization

30th of April 2020

7th of May 2020

14th of May 2020

From 10:00 till 17:00

HACE is organizing several one-day Seminars for everyone who is interested in how to implement a suitable Safety Management System (SMS) into their own EASA Part-145 Organization.

Our SMS experts will be providing information on SMS fundamentals and SMS implementation for Aircraft Line & Base Maintenance Organizations and Component & Engine Repair shops

As per EASA NPA 2019-005 it is expected that EASA Part-145 Approved Maintenance Organizations need to implement their own SMS system from Q3 2020.

Together with all the participants we will discuss the fundamentals of SMS and look at what kind of SMS elements need to be implemented in your company.

At the end of this Seminar you will have all the relevant information directly to be used in your business.
